

HooknLoop — Storefront Redesign

What to change, section by section, from the **current live store** (hooknloop.com.au — “Previous”) to the **new premium design** (React prototype — “Latest”). Each section shows before → after plus the exact specs to implement. Values reference the prototype’s design tokens in `src/styles/tokens.css`.

Type: DM Sans (self-hosted)

Radii: 16 / 10 / 999

Accent: #e87722

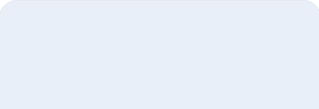

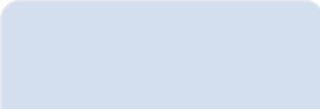

Stack: React → port to Shopify Liquid

Mobile home: 0.67 MB

● Live site: hookn-loop.vercel.app (deployed on Vercel — click any menu, add to cart, browse the industry pages)

1 Colour theme

Palette is tokenised and every text pair is contrast-checked to WCAG AA. Implement as CSS variables; never hard-code hex in components. Red is reserved for system faults only.

 Navy #142548 • --navy	 Navy deep #0f1d3a • --navy-deep	 Royal blue #1952cc • --blue (nav, links)	 Blue hi #2e6ae0 • --blue-hi
 Orange #e87722 • --orange (CTA fill)	 Orange word #f0842a • accent on navy	 Orange ink #b8460a • orange TEXT on white (AA)	 Cloud #f4f7fb • light surface
 Sky #e9eff8 • tint band A	 Sky deep #d3deef • tint band B	 Verified green #146c43 • AA-safe (badges)	 Muted ink #5a6b8c • secondary text

KEY RULES

- **Amber is a FILL, burnt ink is TEXT** — orange CTA buttons use **navy text** (#142548 on #e87722 ≈ 5.1:1). Orange as text uses #b8460a .
- **Section background rhythm**: white → sky tint A → sky tint B → navy accent, so no two adjacent sections share a tone.
- Star ratings + small orange marks use #b8460a (passes the 3:1 graphic minimum); bright #e87722 only for large fills.

2 Typography NOW DM SANS, SELF-HOSTED

The design now uses **DM Sans** — the same face the live hooknloop.com.au theme uses — for both display and body, so the redesign reads as the same brand rather than a different company. It is **self-hosted** as a single variable-weight file; there is no runtime call to Google Fonts.

DISPLAY / HEADINGS — DM SANS 800

Hook & Loop Tape

weight 800 · letter-spacing −0.015em · line-height 1.05

BODY — DM SANS 400 / 600

Industrial hook & loop, dispatched Australia-wide. **Volume pricing** and a GST tax invoice on every order.

base 17px · line-height 1.6

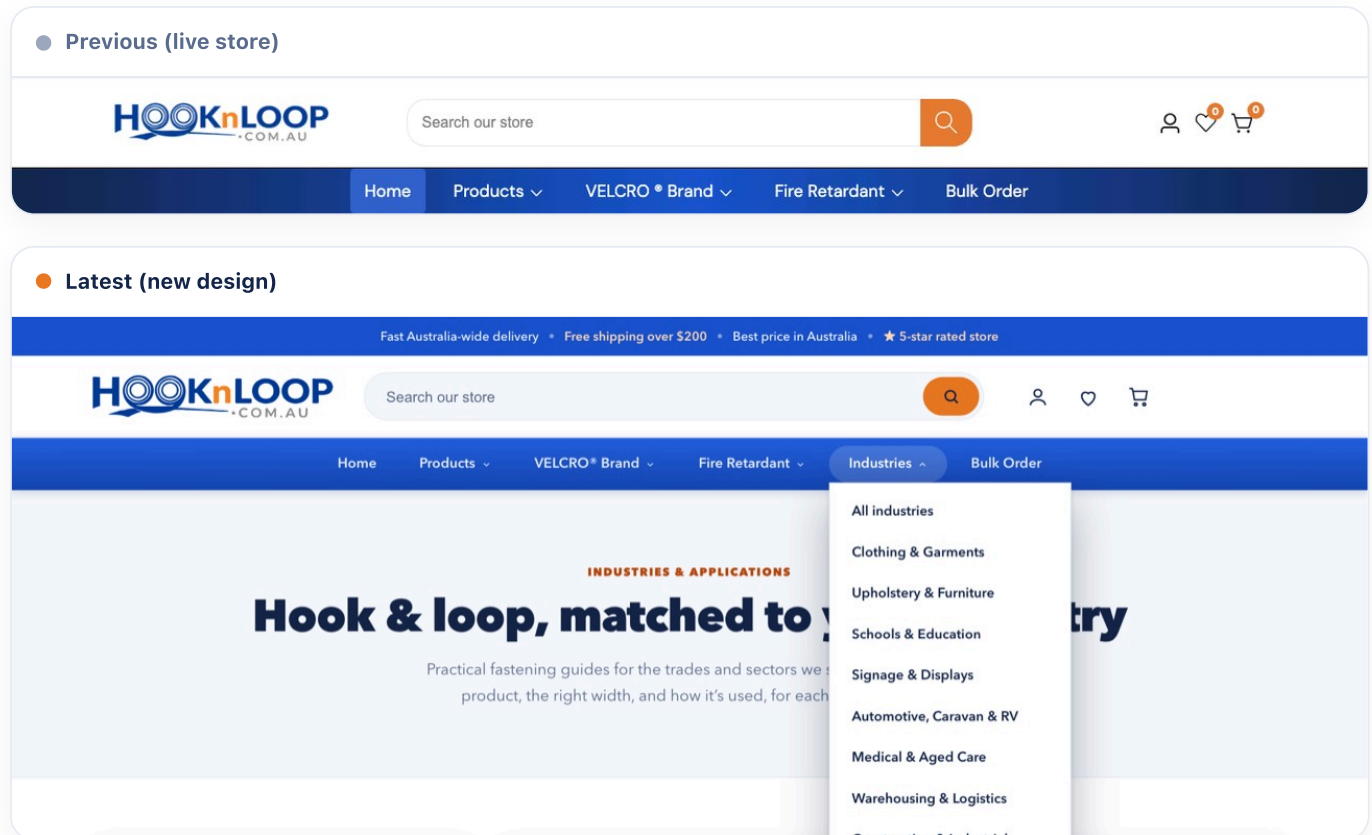

IMPLEMENT

- Font tokens: `--font-head` / `--font-body` = `"DM Sans", "Avenir Next", "Segoe UI", system-ui, sans-serif`.
- One `@font-face` in `src/styles/fonts.css` pointing at `/fonts/DMSans-var.woff2` (62 KB, `font-weight: 100 1000`, `font-display: swap`). Imported **before** tokens and base so the cascade order holds.
- Weights used: **400, 600, 700, 800**. A `.mono` utility (system monospace) is used for SKU/spec/data text.
- Type scale (tokens): hero `clamp(2.5rem, 4.6vw, 4rem)` · h2 `clamp(1.6rem, 3vw, 2.4rem)` · body `1.0625rem`.

Resolved: an earlier draft specified Poppins but never loaded a web font, so it silently fell back to system fonts on every machine. Both halves are now fixed — the face matches the live theme, and the file is actually served. Porting to Liquid: ship the same woff2 as a theme asset; do not add a Google Fonts `<link>`.

3 Navigation bar

Three tiers: royal-blue promo bar · white logo+search row · royal-blue nav. Nav links are **centred**; the dropdowns are curated. On scroll the **nav pins to the top** while the promo strip and logo/search row scroll away — matching the live store. The shot shows the new **Industries** dropdown open.

CHANGES TO IMPLEMENT

- **Vectorised logo** — the store's master is only 389×69 (blurry on retina). Replace with the crisp SVG (`logo-header.svg` colour, `logo-footer.svg` light on navy).
- **Nav bar**: royal-blue `--blue #1952cc` unified with the promo bar; white links `rgba(255,255,255,.9)`, hover pill `rgba(255,255,255,.16)`; links **centred**.
- **Dropdowns are disclosures, not links** — the parent only opens the menu (never navigates). Opens on hover/click/tap/focus; closes on Escape, outside-click, or picking. Chevron rotates 180° when open. Products menu = 8 curated flagship products (not the full list).
- **Header icons**: search (mobile → icon that opens search), account, wishlist, cart; badges only show when count > 0. White focus-ring on the blue nav for keyboard users.
- **Sticky nav on scroll** — the nav is `position:sticky; top:0`; the promo strip and logo/search row scroll away above it (mirrors the store's `header__stick`). An elevation shadow fades in once it's pinned.
- **New "Industries" dropdown** — one entry per application/industry guide (see §31) plus an "All industries" index link.

4 Search bar

A rounded pill search with a prominent orange button; on mobile it collapses to a search icon that opens the search page.

● Previous (live store)

Search our store

● Latest (new design)

Search our store

SPEC

- Pill input (`border-radius:999px`), background `--cloud #f4f7fb` , 1.5px `--line-card` border, height `50px` , placeholder "Search our store".
- **Orange search button** inside the pill (`58px` , `--orange` fill, navy magnifier icon).
- **Focus:** border → `--blue #1952cc` , background → white.
- Carries the typed query to `#search/<query>` (results page pre-fills). On mobile (<560px) the bar becomes a search icon in the header actions.

5 Hero section REBUILT · ELEVATED

A **5-banner** product slideshow on a grained navy background — one banner per buyer type, each routing to the right products. The **first banner mirrors the live store's hero**; the design keeps a monospace “spec-sheet” voice over the navy.

FROM
\$24.46

✓ Fast Australia-wide delivery ✓ Free shipping over \$200 ✓ Best price in Australia ★ 5-star rated store

CHANGES TO IMPLEMENT

- **Five banners** — (1) mirrors the live store's hero: "Hook and Loop Tape — Strips & Fasteners" with the store's four check bullets; (2) Heavy-duty industrial; (3) Premium quality; (4) **Delivered Fast, Australia-Wide** (delivery-network map, shipping message); (5) **Order More. Save More.** (bulk & wholesale, HooknLoop cartons).
- **Monospace technical voice** (the signature): mono eyebrow with a short orange rule; on banners 2–5 the benefit labels are a **mono spec readout** with orange slash separators (e.g. **HEAT-RESISTANT / MOISTURE-PROOF / HEAVY-DUTY**); the tag and the "FROM \$X" price chip are mono. Banner 1 uses the store's bullet list instead of a spec readout.
- **Per-banner skeleton**: mono eyebrow → 5–6-word headline (white + orange accent, tight tracking) → supporting line / bullet list → mono spec readout → primary + secondary CTA. Product photography on the right (white card, mono tag, corner-anchored orange price chip); the delivery banner uses the Australia render, the bulk banner the HooknLoop cartons render.
- **Value-prop trust strip on every banner** — Fast Australia-wide delivery · Free shipping over \$200 · Best price in Australia · ★ 5-star rated.
- **Every button routes somewhere real** — no dead links (the old "Help me choose" finder button is gone).
- **Motion**: infinite auto-advance every **5s** (crossfade + product scale-in); **never pauses** (no hover/focus pause) and **not gated on reduced-motion** — the slide still changes, just with a quick fade. The **slide indicator bars were removed**. No arrows.
- **Background**: layered navy radial gradients + fine SVG grain + a warm orange ambient glow; the product card floats on a soft blue spotlight with a hairline border and layered shadow.

● Card detail (hover state)

CARD SPEC + ANIMATION

- White card, `border-radius:16px`, `1px` `--line-card` border, contained product image (`object-fit:contain`, padding).
- **Hover animation:** `translateY(-4px)` + elevated shadow, `transition:.16s/.2s`. Badge (e.g. "Best seller") top-left (stays above the image, `z-index`).
- **Dynamic hover image-switch:** the 2nd product photo cross-fades in on hover (like the live store), with a subtle image zoom.
- **Wishlist heart** top-right (localStorage toggle) — fills orange when saved.
- Price shows **"From \$X . incl. GST"** — the live store's real starting price; CTA "Add to cart".

7 "Why HooknLoop" section REDESIGNED

A 3x2 grid of value tiles on the sky-deep tint band. Premium icon chips, soft always-on elevation, orange edge on hover.

SPEC

- Section on `--sky-deep` band; centered eyebrow ("Why HooknLoop", `#b8460a`) + h2.
- 6 tiles: white card, `border-radius:16px`, icon chip `52px` radius 12px with a subtle orange gradient + inset ring.
- **Hover:** `translateY(-4px)`, shadow up, border → `rgba(232,119,34,.35)`.
- Content = trade reorder drivers: Fast Australian shipping · Secure payment · Bulk & trade pricing · Fire-retardant grades · GST tax invoice · Australian owned.

8 Reviews — “What our customers say” REDESIGNED

A clean 3×2 grid of equal-height review cards, led by trade voices, with a headline rating pill.

● Previous (live store)

Testimonials

What Our Customers Say

Linda P.
Canberra, ACT

I'm a high school design tech teacher and we order from HooknLoop for student projects. The self-adhesive rolls are great because kids can cut exactly what they need. Pricing is reasonable for our budget and they don't mind doing tax invoices for the school which makes purchasing easy. The quality means student projects actually work properly instead of falling apart!

Tom W.
Hobart, TAS

Bought some of the VELCRO brand stuff from HooknLoop for a boat cover repair. Wasn't sure if it'd handle the salt and UV but it's been 8 months and still going strong. Bit more expensive than the generic but worth it for marine use. Arrived in 3 days which saved me missing a weekend trip. Cheers!

Sarah M.
Melbourne, VIC

Been using HooknLoop for our upholstery business for about 18 months now. The adhesive backed stuff is honestly better than what we were getting from our previous supplier at nearly double the price. Sticks properly and the hook side doesn't wear out after a few uses like the cheap rubbish. Fast delivery too which helps when we're in a rush on projects.

REVIEWS

What our customers say

★★★★★ 4.87 / 5 15 verified reviews across Australia

"Better than what we were getting from our previous supplier, and it turns up fast."

Sarah M.
Melbourne, VIC

✓ Verified

"Quality is spot on – exactly what we needed for our aged-care fit-out."

Rachel K.
Perth, WA

✓ Verified

"Consistent every order, and cutting to length means almost no offcut waste for us."

Jessica L.
Sydney, NSW

✓ Verified

"Repaired a boat cover with it – eight months out in the weather and it's still going strong."

Tom W.
Hobart, TAS

✓ Verified

"The cable straps still grip like new after six months of daily on-and-off."

Dave T.
Brisbane, QLD

✓ Verified

"The self-adhesive rolls are great – the kids can cut exactly what they need for their projects."

CHANGES TO IMPLEMENT

- **Header:** "Reviews" eyebrow + "What our customers say" + a rating pill (★★★★★ 4.87 / 5 · 15 **verified reviews** across Australia).
 - **Layout:** fixed 3×2 grid with **equal-height cards** (quote flex-grows, author row pinned to the bottom) — replaces the ragged/long-card layout. Led by trade voices; keep one durability story, not three.
 - **Card:** 5 orange stars (#b8460a — AA), quote, an **initials avatar** (navy circle), name + city/state, and an AA-safe green "✓ **Verified**" badge (#146c43). "Read all 15 reviews →" link below.
 - Star ratings carry an accessible `aria-label` ("Rated 5 out of 5").
-

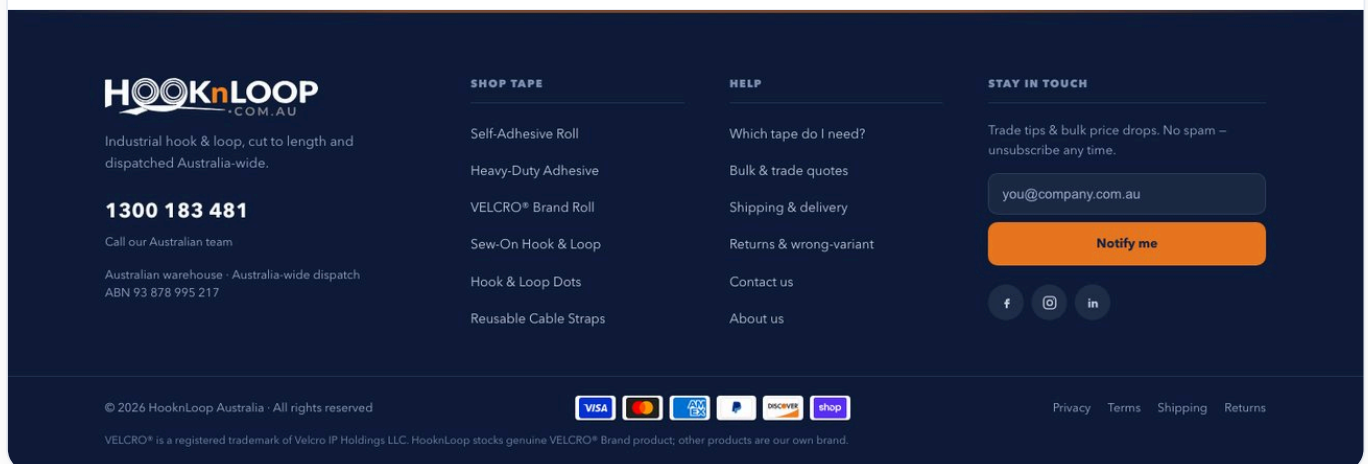

9 Footer

Four columns (brand · shop · help · stay-in-touch with the newsletter) + a legal bar carrying the payment logos.

● Previous (live store)

● Latest (new design)

CHANGES TO IMPLEMENT

- **Copy:** every "Melbourne" store reference → **"Australian"** (it's a national store). e.g. "Australian warehouse · Australia-wide dispatch", "Call our Australian team".
- **Structure:** 4 columns — Brand+phone+ABN · Shop tape · Help · **Stay in touch** (newsletter with email + Notify me). One heading per column, shared baseline hairline.
- **Payment logos** in the legal bar: Visa · Mastercard · Amex · PayPal · Discover · Shop Pay (real full-colour SVGs on white chips).
- Legal bar: © line · payment marks · policy links, on one row. Light vectorised logo on navy.

10 Cart page

Two columns: line items + tools (discount code + shipping calculator) on the left, a sticky summary on the right — matching the live store's cart.

SPEC

- **"Apply a discount code" bar** (input + Apply) — confirms the code will be applied at checkout.
- **"Estimate Shipping" calculator** (matches the live store): state dropdown + Postal/ZIP + orange "Shipping calculator" button → returns the store's real rates **Standard \$12.00 / Express \$18.00**, or Free Standard once the subtotal passes \$200.
- **Free-shipping progress bar** in the summary: "\$X AUD away from Free Standard Shipping" with an orange fill + a **truck knob** that rides the bar.
- Summary: Subtotal (AUD) · "Tax included. Shipping calculated at checkout." · Checkout · **Shop Pay / PayPal / G Pay** badges · trust list.
- Line items: media · info (name link + variant + remove) · qty stepper · line total. Empty state: icon + "Your cart is empty" + Shop-all CTA.

11

Wishlist page

NEW

Saved products (localStorage), same card grid as the shop, with a "Clear all" action and an empty state.

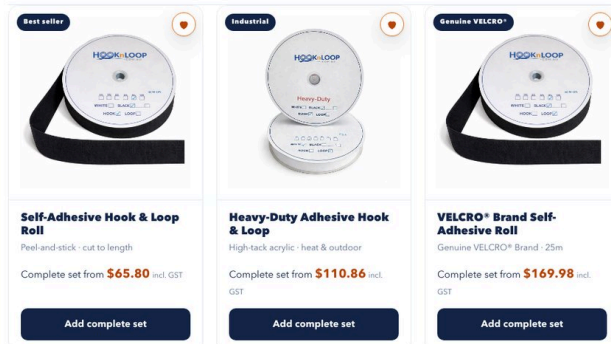

Latest (new design)

SAVED

Your wishlist

3 saved products · kept on this device

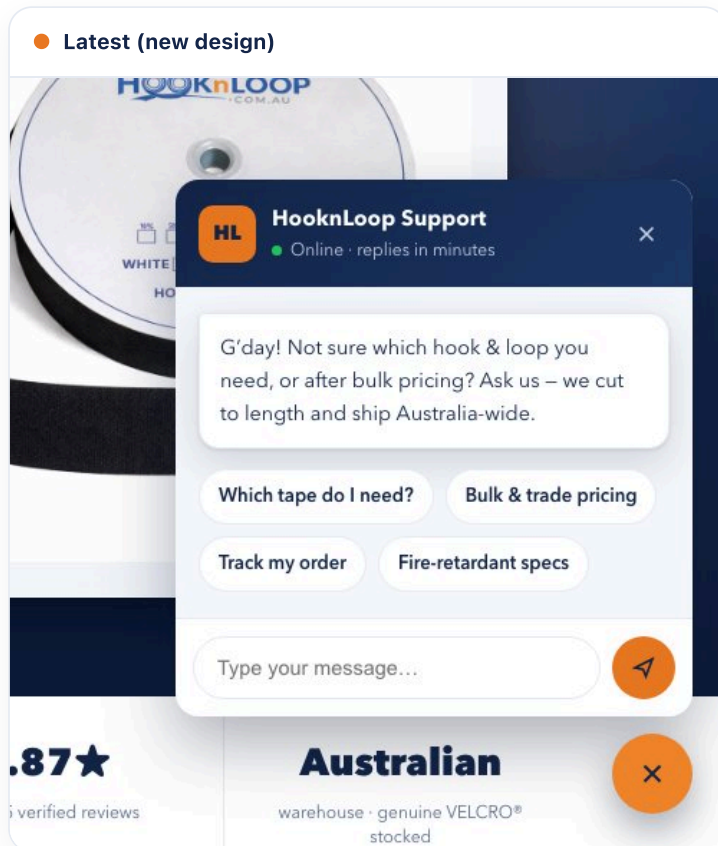

Clear all

SPEC

- Header: "Saved" eyebrow + "Your wishlist" + count ("kept on this device") + **Clear all** button.
- Grid of product cards (reuses the shop card). Heart on each card toggles membership; header wishlist badge updates live.
- Empty state: heart icon + "Nothing saved yet" + Shop-all CTA.

The live store's chat launcher uses a **female support-agent photo** as its avatar. The new design drops that photo for a neat, branded support panel with working quick-replies.

SPEC

- **No agent photo** — the old store's female support-agent avatar must **not** carry over. The launcher and panel use a clean brand icon only, so the widget stays neat and on-brand.
- Launcher = orange circular FAB, bottom-right, with an online dot.
- Panel: navy gradient header ("HL" chip · "HooknLoop Support" · Online · replies in minutes), a greeting message, and **quick-reply chips** that navigate (Which tape do I need? → finder; Bulk & trade pricing → bulk; Track my order → contact; Fire-retardant specs → collection).
- Message input + send; on send shows a "we'll reply shortly" confirmation.
- Panel width `360px`, `max-width: calc(100vw-44px)`, entrance animation `0.22s`.

13

Call button

NEW

A dedicated floating call button, bottom-left — a clean white circular icon that dials 1300 183 481.

Latest (new design)

SPEC

- Circular `56px` FAB, bottom-left, white background / navy icon, `href="tel:1300183481"`.
- Hover tooltip "Call 1300 183 481"; hover lift `translateY(-2px)`.
- Both FABs (call + chat) **park (fade out) when the footer is on screen** so nothing fixed ever covers it; on mobile they also hide while the PDP add-to-cart dock is open.

14

Animations to add

All motion is 150–300ms, GPU-friendly (transform/opacity only), and respects `prefers-reduced-motion`.

MOTION INVENTORY

- **Hero auto-slider:** 4 slides auto-advance every **5s** (crossfade opacity 0.6s + slide `translateY`); the product card **scales in 0.97→1**; the active progress dot fills over 5s. Pauses on hover/focus; reduced-motion pins slide 1. Grained navy background + a blue spotlight behind the product.
- **Facilities marquee:** seamless infinite ticker (two identical rows, `translateX(-50%)`, ~48s linear); pause on hover; reduced-motion → static scrollable row.
- **Product / value / category cards:** hover `translateY(-4px)` + elevated shadow.
- **Nav dropdowns:** fade+slide open (0.15s); chevron rotates; state-driven (hover/click/tap/focus).
- **PDP sticky add-to-cart dock:** glass panel slides up when scrolled past the CTA, retires before the footer; centred with side-gutters so it clears the corner FABs.
- **Floating buttons:** fade/park when the footer is in view (IntersectionObserver).
- **Buttons:** hover `translateY(-1px)`; add-to-cart success → green "✓ Added".

Reduced motion: a global `@media (prefers-reduced-motion: reduce)` rule near-zeroes all animation/transition durations; the marquee and hero fall back to static frames.

15 Homepage & product-page redesign

A second pass rebuilt the homepage around the live store's real sections and rebuilt the product page. Sections 16–23 show each change, previous → latest.

HOMEPAGE — REMOVED

- The guided **“which tape?” questionnaire**, the **stats strip** (100,000m+ / 1–2 day / ...), the **“Find your fastener” category grid**, and the **fire-retardant band**.

NEW SECTION ORDER

- Hero → One-Stop Shop → Best Sellers & Offers → Trusted Supplier → Why HooknLoop →
Reviews

16

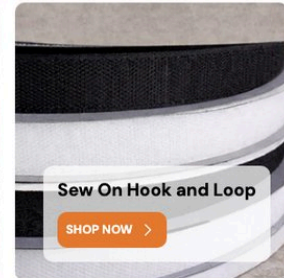

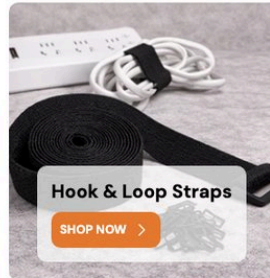

One-Stop Shop — lifestyle categories

NEW

The live store's "Australia's One-Stop Shop" band, rebuilt as a premium lifestyle bento — one large featured tile plus supporting tiles, each linking to its collection.

Australia's One-Stop Shop for Hook and Loop Tapes

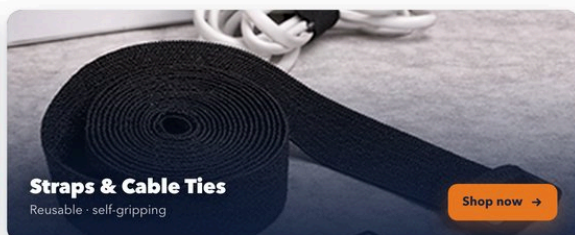

Welcome to HooknLoop.com.au, your trusted Australian destination for premium hook and loop tape solutions. We specialise exclusively in this fastening system, making it simple to find the right product for home, commercial, industrial, and DIY use.

SHOP BY CATEGORY

Australia's one-stop shop for hook & loop

Your trusted Australian destination for premium hook & loop – home, commercial, industrial and DIY. We specialise in this one fastening system, so it's simple to find exactly the right product.

WHAT CHANGED

- 12-column bento: a large featured tile (Dots & Coins) + three supporting tiles (Straps, Sew-On, Self-Adhesive).
 - Real lifestyle photography with a dark scrim for legibility (WCAG-safe white text), `object-fit:cover`, hover-zoom `scale(1.06)`.
 - Each tile links to `collection/<slug>` with an orange "Shop now →" affordance.
-

17

WHAT CHANGED

- All **12 products** in a responsive 4-column grid, each a full product card.
 - **Real star ratings + review counts** per product (from the live listings); "No reviews yet" where the store shows none.
 - **Brand label** (HooknLoop) above each name; **corrected per-product images** (VELCRO, sew-on, velcoin and FR sew-on were previously wrong).
 - Heading "Best sellers & offers"; the "offers" leads on the real **bulk/volume discounts** (no faked sale prices).
-

The live store's "Trusted Hook and Loop Supplier" copy, rebuilt as a two-column editorial section with the original Australia-wide delivery image.

● Previous (live store)

Trusted Hook and Loop Supplier for B2C & B2B Customers

Proudly serving both B2C and B2B customers across Australia, we focus on quality products that work in real-world conditions. No cheap alternatives are available. Every product offered at HooknLoop.com.au is carefully selected based on material quality, performance testing, and long-term reliability, such as hook and pile tape solutions.

Wholesale, Bulk & Discounted Hook and Loop Supplies

With a large range of fasteners, tapes, straps, and accessories held in stock, we offer competitive pricing for retail, trade, and commercial buyers. Buy hook and loop tape roll, in bulk, or at wholesale rates, with volume discounts available for larger orders. Sourcing fastening solutions is simple, cost-effective, and reliable.

★★★★★

4.87 / 5

Serving B2C & B2B across Australia

WHAT CHANGED

- Icon-led value blocks for the two original headings (B2C/B2B quality + wholesale/bulk); verbatim store copy, lightly tightened.
 - The **original composite image** (hand + glowing Australia delivery map + HooknLoop boxes), optimised 2.2 MB → 256 KB, framed with a 4.87/5 proof card.
 - Orange "Read more" CTA.
-

19

Product cards — brand, rating, correct image

UPDATED

Every product card now carries the brand, its real rating, and the correct photo.

Best seller

HOOKNLOOP

Self-Adhesive Hook & Loop Roll

★★★★☆ 4.0 · 1 review

Peel-and-stick · industrial

From **\$32.90** incl. GST

Add to cart

WHAT CHANGED

- **Brand label** "HOOKNLOOP" (blue, uppercase) above the product name.
- **Real star rating + review count** under the name (burnt-ink stars, AA-safe); "No reviews yet" when the live listing has none.
- **Correct product photo** per item — the earlier build reused generic shots for VELCRO, sew-on, velcoin and FR sew-on.
- **Dynamic hover image-switch** — the 2nd product photo cross-fades in on hover (badge stays on top).
- **Accurate price** — shows the live store's real **"From \$X"** starting price (no more doubled "complete set"); CTA reads **"Add to cart"**.

20 Product page REBUILT

The buy box gains the brand, a real rating and SKU; the confusing hook/loop dropdown is gone.

Hook or Loop?: Hook

Hook Loop Both

● Latest (new design)

Description

Our Self-Adhesive Hook and Loop Roll is a reusable, useful and handy fastening solution crafted to make installation easy without drilling, screwing or permanent fixing. With an amazing, durable pressure-sensitive adhesive backing, this hook-and-loop system firmly bonds to smooth surfaces. Allowing repeated opening and closing, it remains strong with multiple uses with no loss of grip. It is a dependable sticky hook and loop fastener, delivering steady holding strength for everyday use. Perfect for home projects and commercial applications, this fastener is a dependable and adhesive solution. The rolls come with the beneficial flexibility of cutting down to custom lengths to suit your exact needs.

Key features

- Strong rubber adhesive for indoor & outdoor use.
- Made from 100% premium nylon.
- Works in temperatures from -10°C to 70°C.
- Durable and long-lasting performance.
- Reusable up to 5,000 times.
- Strong self-adhesive backing for quick and tool-free installation.
- Customisable length - cut to size as required.

Key applications

- Securing mats, rugs & lightweight panels
- Office, home & DIY projects
- Craft, display & signage
- Temporary mounting & organisation
- Displays & exhibitions

Specifications

Material	100% nylon
Backing	Pressure-sensitive rubber adhesive
Width	20 / 25 / 50 mm
Length	25 m per roll
Colours	Black - White
Temperature	-10°C to 70°C
Reusability	Up to 5,000 open/close cycles

Specifications are from the manufacturer's data. Fire-retardant standards are on the supplier's technical data sheet, supplied on request – we don't publish a rating we can't certify.

Questions, answered

Do I need to buy the hook and loop separately, or does it come together?

VERIFIED

Good service Quick

Good service Quick delivery

WHAT CHANGED

- **Brand + real rating + SKU** in the title block; **price-per-metre** beside the price.
- **Opens at the store's from-price** — a single side (Hook) is pre-selected so the price matches the live store (\$32.90 etc.), with “Both” kept as a badged “Recommended” upsell in the 3-card segmented control (replacing the old plain dropdown).
- **Auto-advancing gallery** — the product images auto-slide every 3.5s with a soft fade (pauses on hover, respects reduced-motion); thumbnails + click still work.
- **Removed the buy-box trust list** — reassurance moved to the Buy More & Save trust strip (§21).
- Correct gallery images + thumbnails per product.

21

Buy More & Save

REDESIGNED

The live store's volume-discount block, rebuilt premium and placed on the product page.

● Previous (live store)

The previous design features a dark blue header with navigation links: Home, Products, VELCRO® Brand, Fire Retardant, and Bulk Order. Below the header, the 'Buy More & Save' section is highlighted with a light gray background. It contains four blue buttons with orange text: 'Buy 5+ SAVE 5%', 'Buy 10+ SAVE 10%', 'Buy 20+ SAVE 20%', and 'Buy 50+ SAVE 30%'. A small note below the buttons states 'Discount applied automatically at checkout.' Below this, three service icons are displayed: 'Fast Australian Shipping' (truck icon), 'Secured Payment' (lock icon), and 'Easy Returns' (box icon). At the bottom, there are two buttons: 'Description' and 'Privacy policy'.

● Latest (new design)

The latest design features a dark navy gradient background with an orange glow. The title 'Buy more & save' is prominently displayed in white. Below the title, a subtitle reads: 'The more you order, the less you pay – volume discounts apply automatically at checkout, no code needed.' The discount tiers are presented in four dark blue boxes with orange text: 'Buy 5+ 5% OFF', 'Buy 10+ 10% OFF', 'Buy 20+ 20% OFF', and 'Buy 50+ 30% OFF'. The 'Buy 50+' tier is highlighted with an orange 'BEST VALUE' ribbon. Below the discount tiers, three service icons are displayed: 'Fast Australian shipping' (truck icon), 'Secured payment' (lock icon), and 'Easy returns' (box icon). At the bottom, a product card for 'Self-Adhesive Hook & Loop Roll' (20mm x 25m · Black · Both) is shown with a price of '\$65.80 incl. GST' and an 'Add to cart' button.

WHAT CHANGED

- Navy-gradient band with an orange glow; 4 tiers (Buy 5+/10+/20+/50+ → 5/10/20/30% off) with a **"Best value"** ribbon on the top tier.
- Slim **trust strip** beneath: Fast Australian shipping · Secured payment · Easy returns.
- **Implementation note:** the tiers are a visual promise in the prototype — wire them to real Shopify automatic cart discounts so checkout actually applies them.

Product FAQs

REAL CONTENT

Each product page now shows its own real, product-specific FAQs.

● Previous (live store)

Do I need to buy the hook and loop separately, or does it come together? —

No way, you don't have to get them apart. You can choose the hook by itself, the loop by itself, or "Both" can be attached to your purchase; this breeds simplicity and the door of immediate usage for the user without any complexity.

What surfaces does this self-adhesive hook-and-loop tape stick to? +

How many times can this sticky hook and loop fastener be reused? +

Can I cut the self-adhesive hook & loop tape roll to a shorter length? +

Does this adhesive hook-and-loop

● Latest (new design)

Questions, answered

Do I need to buy the hook and loop separately, or does it come together? +

What surfaces does this self-adhesive hook-and-loop tape stick to? +

How many times can this self-adhesive hook and loop fastener be reused? +

Can I cut the self-adhesive hook & loop tape roll to a shorter length? +

Does this adhesive hook-and-loop work outdoors or in warm conditions? +

WHAT CHANGED

- **Per-product FAQs** pulled from each live product page (9 of 12 had them); answers rewritten from the store's rough copy into clean, professional English — facts preserved.
- The 4 products with no FAQ on the live store (heavy-duty adhesive, fabric, both fire-retardant) get FAQs written from their real spec sheets — no invented facts.
- Accordion UI, one open at a time.

24 Top value-prop bar NEW

A clean blue bar above the header carrying the store's key value props.

INDUSTRIES & APPLICATIONS

Hook and Loop for Clothing & Garments

Hook and loop fasteners for clothing & garments have always been a trusted choice of tailor, costume designer, or clothing manufacturer, as it brings in the cleanest and most suitable alternative to buttons, zips, and snaps for you. Designed to work across a wide range of fabrics, these are suitable for lightweight cotton as well as heavier woven textiles. Available in different types like sew-on formats specifically suited to textile use, these are the handy choices for the cloth industry. With the right hook and loop products from HooknLoop, garments can be made adjustable, easier to put on and take off, and durable across repeated wash cycles.

● Second in-article photo (velcro in use)

Waistband and Belt Adjusters

Hook and loop tape sewn inside waistbands allows for a range of fit adjustments without visible external hardware. This is common in school uniforms, work trousers, and maternity wear.

Hem and Alteration Work

Tailors and home sewers use narrow hook and loop strips as temporary or permanent hem solutions, particularly for trousers and skirts that need to hang cleanly without visible stitching.

Key characteristics to look for

IMAGERY

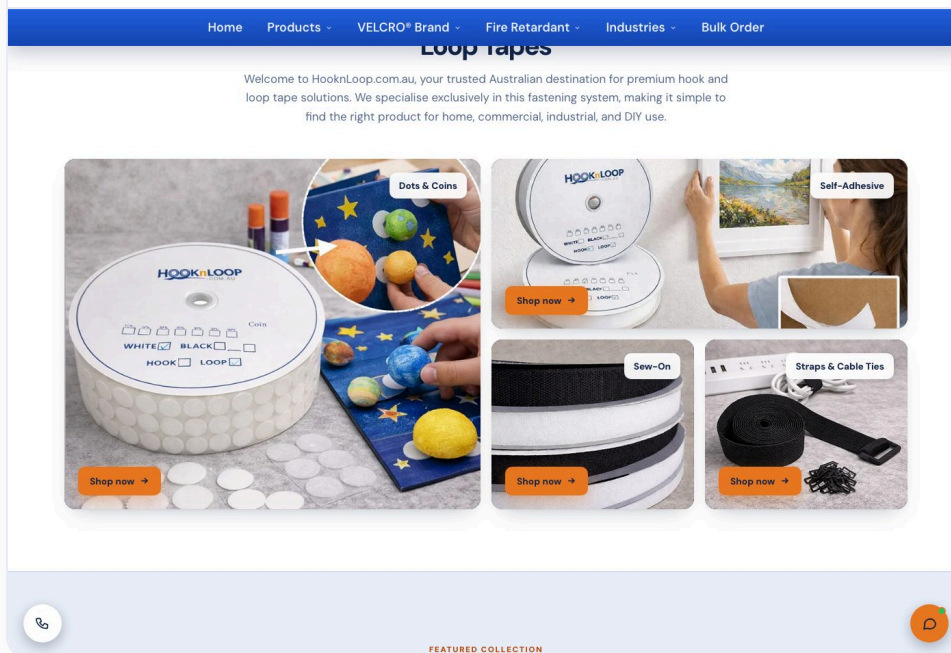

- Each guide carries a **featured photo** plus a **second in-article photo** — photoreal shots (real hands, fine detail) with the black hook-and-loop clearly the subject in that specific application: sewing onto a garment, coin dots on a classroom board, a strap bundling cables, a brace strap, and so on.

SPEC

- **Article layout:** single readable column — intro → “Common use cases” (heading + paragraph each) → “Key characteristics” (orange-check list) → “Recommended products” (paragraphs + product links) → “Related pages” → Shop-all CTA. Hairline dividers between sections; no cards or image boxes.
- **Content is the store's own copy**, verbatim. Data-driven from `src/data/industries.js`; one shared component renders all eight.
- **Per-page SEO:** each sets its own `<title>` and meta description; recommended product names link to their PDPs; related links cross-link the other guides.
- **Nav:** an “Industries” dropdown lists all eight + an “All industries” index link.

The four lifestyle tiles now deep-link **straight to a product page** rather than a category listing, so it is one click from the homepage to a buy button. Each tile carries a frosted **name chip** so the category is legible over any photograph.

One-Stop tiles — name chip, direct product link

SPEC

- Tile click → `product/<handle>`, not `collection/<slug>`. Handles are real catalogue entries, so the link never lands on an empty listing.
- **Name chip**: top-right, white at 94% with a 6px backdrop blur, navy 800 text, control radius. A chip rather than a full scrim keeps the photography visible.
- No merchandising badges on these tiles — they were tried and removed; two competing labels on one small photo reads as clutter.
- On phones the chip moves to a **bottom gradient scrim** and the per-tile “Shop now” button is dropped (the whole tile is already the link). See §36.

Home Products ▾ VELCRO® Brand ▾ Fire Retardant ▾ Industries ▾ Bulk Order

“

Four years ago, HooknLoop began in a single garage warehouse with one simple promise: to make sourcing hook and loop tape effortless.

Since then, every order, every project and every customer relationship has helped shape who we are today. We're proud to supply premium hook and loop solutions across Australia, supporting more than 26 industries—from construction to education—across both the public and private sectors, from small retail orders to large-scale wholesale requirements.

No matter the size of the connection, we believe it matters. Thank you for trusting us to be part of yours.

FOUNDER, HOOKNLOOP

HooknLoop. **Made to connect.**

LOADING DISCIPLINE — READ THIS BEFORE PORTING

- The video is **not** loaded on page load. The `<source>` is attached only when the section comes within 300 px of the viewport, via `IntersectionObserver`.
 - **Phones get a separate 3.5 MB 480p encode and only after a deliberate tap.** Desktop gets the 16 MB 720p file and autoplays muted. A phone on mobile data should never spend megabytes on a video it did not ask for.
 - Playback is tied to visibility — scrolled out of view, it pauses, so we are never decoding frames nobody is watching.
 - `prefers-reduced-motion` never autoplays anywhere; those visitors get the poster and a play button.
 - **Why this matters:** the first cut used `autoplay` + `preload="metadata"`. Browsers that honour autoplay fetch the whole file regardless of `preload`, so every phone visitor downloaded 16 MB before scrolling anywhere near it. See §37.

Cart drawer — slide-in side panel

NEW

Adding to cart used to be silent — the item went in and nothing happened. A drawer now slides in from the right on every add, from the product page **and** from Quick Add on any product card.

● Cart drawer — desktop

Checkout

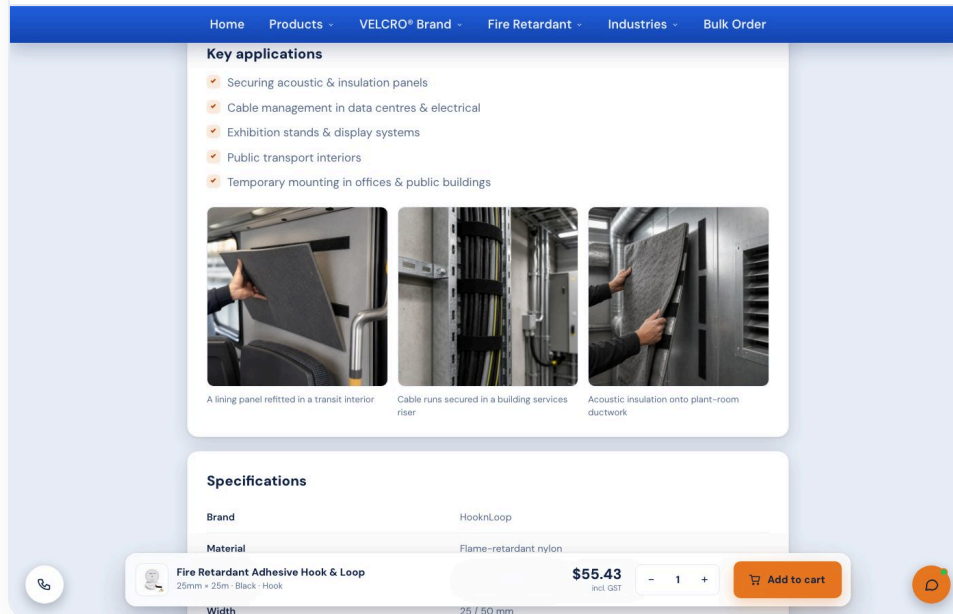

View cart (1)

SPEC

- 420 px panel, full-width below 480 px. Slides 0.26s; backdrop fades 0.2s. Closes on backdrop click, Escape, or "View cart".
- Contents mirror the cart page exactly — line items with quantity steppers and remove, free-shipping progress, subtotal, Checkout and View cart.
- **Body scroll is frozen while it is open** (`body.drawer-open`). Background scrolling under an open sheet is the classic "feels broken" mobile bug.
- The corner call/chat buttons hide while it is open so nothing floats above the backdrop.
- **Buy with Shop** deliberately skips the drawer — it navigates straight to checkout, so a confirmation panel would be in the way.

Every product now carries in-use photography directly under **Key applications**. The bullet list says what the product is for; these show it. Captions describe the scene rather than restating the bullet above them.

● In-use shots under Key applications (three-up variant)

SPEC

- **25 images across 12 products** — two each, three for Fire Retardant Adhesive. WebP, capped at 1100 px, ~100 KB each, `loading="lazy"` so they cost nothing until scrolled to.
- Data lives in `src/data/applicationShots.js` as `handle → [[src, caption], ...]`. The component renders whatever it finds, so a new product with no shots renders nothing rather than a broken grid.
- Grid adapts to count: **two-up** by default, **three-up** on desktop when there are three. On a phone, three becomes two squares plus a full-width 16:9 banner — a third square would be enormous on a 390 px column.
- Square 1:1 crops, because the gallery frame is `aspect-ratio: 1`. Generation prompts for all of them are kept in `storefront/docs/application-image-prompts.md` so future products can be shot to match.

Mobile experience — rebuilt

MAJOR

The phone view was desktop content squeezed into a narrow column: hero type at desktop scale, body copy centred nine lines deep, prices breaking mid-figure ("From \$66.74 incl. / GST"), four full-height category tiles stacked into a mile of scroll. It read like a shrunken website. It now reads like an app.

● Hero — fits one screen, one decisive CTA

HOW IT IS BUILT

- **One override layer:** `src/styles/mobile.css`, imported **last**, every rule inside a `max-width` query. No existing stylesheet was modified, so desktop is provably untouched.
- **Phone type scale** and a 34 px section rhythm (desktop's 40–96 px is dead air on a phone).
- **Horizontal snap rails** for best sellers, reviews, trust stats, size pills and collection filters. Each bleeds to the screen edge so the cut-off card signals “swipe me”. This is the single strongest “native” signal available in CSS.
- **No mid-figure wrapping.** Rating, spec and price are each forced onto one line; names clamp to two; card heights are equal. Ragged card text was the specific thing that read as cheap.
- **Long SEO copy is clamped** (One-Stop blurb, Trusted Supplier paragraphs) — the “Read more” button now has a job to do.
- **App-grade basics:** 44 px touch targets, `env(safe-area-inset-*)` on everything pinned to the bottom, momentum scrolling, pressed states, and **16 px inputs** so iOS never zooms on focus.

Two traps worth knowing. Setting `overflow-x: hidden` on `html / body` as an anti-overflow guard **silently disables** `position: sticky` and makes iOS scrolling fight touch input — it was removed. And `scroll-snap-type: x mandatory` fights the thumb near rail edges; `proximity` is the right setting. Verified clean at 360 / 390 / 430 px with no horizontal overflow anywhere.

37 Performance budget NEW

The mobile home page was transferring **26.5 MB**. It now transfers **0.67 MB**. This is the single biggest change in the build and the one most likely to be undone by accident, so it is written down.

WHERE THE 26 MB WENT, AND WHAT FIXED IT

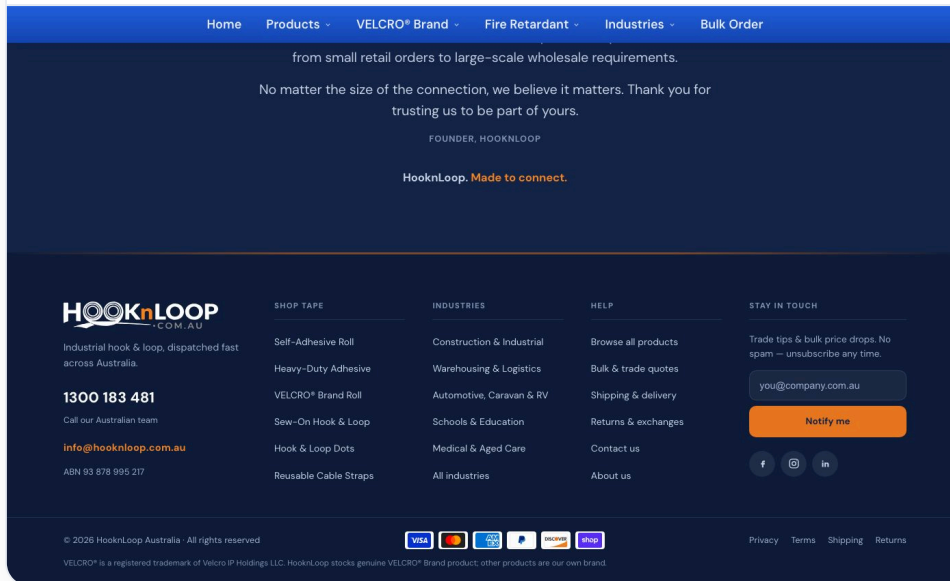

- **16.1 MB — the brand film.** `autoplay` forces a full fetch regardless of `preload`. Now lazy-attached, phone-specific 3.5 MB encode, tap-to-play. See §33.
- **6.4 MB — images.** Several were 12-megapixel phone photos (3024×4032, 1.7 MB each); several more were photographs saved as **PNG** at 1.5 MB. 44 files converted to WebP capped at 1200 px: image directory **27.4 MB → 6.1 MB**, no visible quality loss. WebP preserves alpha, so transparent product cut-outs still composite correctly.
- Remaining payload is ~95 KB gzipped JS + ~23 KB gzipped CSS + the fonts.

Rules to keep it there. No source image over ~1200 px on the long edge. Photographs are WebP or JPEG, never PNG — PNG is for flat graphics and cut-outs only. Any new video is lazy-attached and given a phone encode. Nothing above the fold autoplays.

38 Footer — Industries column & contact UPDATED

A fifth column of **Industries** links mirrors the header dropdown, and the contact block now carries the email address alongside the phone number.

● Footer — five columns

SPEC

- Grid is `1.4fr 1fr 1fr 1fr 1.2fr`; collapses to two columns under 1000 px with brand and newsletter spanning full width.
- Industries column: five curated guides plus "All industries", using the same real slugs as the header dropdown (`src/data/industries.js`) so the two can never drift apart.
- `info@hooknloop.com.au` as a highlighted `mailto:` under the phone number, in `--orange-word`.

HooknLoop design handoff · generated from the React prototype · all values in `src/styles/tokens.css`
