

HooknLoop — Storefront Redesign

What to change, section by section, from the **current live store** (hooknloop.com.au — “Previous”) to the **new premium design** (React prototype — “Latest”). Each section shows before → after plus the exact specs to implement. Values reference the prototype’s design tokens in `src/styles/tokens.css`.

Type: Poppins

Radii: 16 / 10 / 999

Accent: #e87722

Stack: React → port to Shopify Liquid

🟢 Live interactive preview: playback-reimburse-outbound.ngrok-free.dev (ngrok tunnel to the running prototype — click any menu, add to cart, etc.)

1 Colour theme

Palette is tokenised and every text pair is contrast-checked to WCAG AA. Implement as CSS variables; never hard-code hex in components. Red is reserved for system faults only.

Navy
`#142548 · --navy`

Navy deep
`#0f1d3a · --navy-deep`

Royal blue
`#1952cc · --blue (nav, links)`

Blue hi
`#2e6ae0 · --blue-hi`

Orange
`#e87722 · --orange (CTA fill)`

Orange word
`#f0842a · accent on navy`

Orange ink
`#b8460a · orange TEXT on white (AA)`

Cloud
`#f4f7fb · light surface`

Sky
`#e9eff8 · tint band A`

Sky deep
`#d3deef · tint band B`

Verified green
`#146c43 · AA-safe (badges)`

Muted ink
`#5a6b8c · secondary text`

KEY RULES

- Amber is a FILL, burnt ink is TEXT — orange CTA buttons use **navy text** (`#142548` on `#e87722` $\approx$ 5.1:1). Orange as text uses `#b8460a`.
- Section background rhythm: white → sky tint A → sky tint B → navy accent, so no two adjacent sections share a tone.
- Star ratings + small orange marks use `#b8460a` (passes the 3:1 graphic minimum); bright `#e87722` only for large fills.

2 Typography DM SANS → POPPINS

The live store uses **DM Sans**. The new design uses **Poppins** for both display and body — rounded, friendly, geometric, matching the brand.

DISPLAY / HEADINGS — POPPINS 800

Hook & Loop Tape

weight 800 · letter-spacing -0.015em · line-height 1.05

BODY — POPPINS 400 / 600

Industrial hook & loop, dispatched Australia-wide. **Volume pricing** and a GST tax invoice on every order.

base 17px · line-height 1.6

IMPLEMENT

- Font tokens: `--font-head / --font-body` = `"Poppins", "Avenir Next", "Segoe UI", system-ui, sans-serif`.
- Weights used: **400, 600, 700, 800**. A `.mono` utility (system monospace) is used for SKU/spec/data text.
- Type scale (tokens): hero `clamp(2.5rem, 4.6vw, 4rem)` · h2 `clamp(1.6rem, 3vw, 2.4rem)` · body `1.0625rem`.

Action item: Poppins is referenced in the tokens but **no web font is loaded** in the prototype. For production, load Poppins (Google Fonts link or self-hosted `@font-face`, weights 400/600/700/800) or it silently falls back to system fonts.

3 Navigation bar

Three tiers: royal-blue promo bar · white logo+search row · royal-blue nav. Nav links are **centred**; the dropdowns are curated.

CHANGES TO IMPLEMENT

- **Vectorised logo** — the store’s master is only 389×69 (blurry on retina). Replace with the crisp SVG (`logo-header.svg` colour, `logo-footer.svg` light on navy).
- **Nav bar:** royal-blue `--blue #1952cc` unified with the promo bar; white links `rgba(255,255,255,.9)` , hover pill `rgba(255,255,255,.16)` ; links **centred**.
- **Dropdowns are disclosures, not links** — the parent only opens the menu (never navigates). Opens on hover/click/tap/focus; closes on Escape, outside-click, or picking. Chevron rotates 180° when open. Products menu = 8 curated flagship products (not the full list).
- **Header icons:** search (mobile → icon that opens search), account, wishlist, cart; badges only show when count > 0. White focus-ring on the blue nav for keyboard users.

4 Search bar

A rounded pill search with a prominent orange button; on mobile it collapses to a search icon that opens the search page.

SPEC

- Pill input (`border-radius:999px`), background `--cloud #f4f7fb` , 1.5px `--line-card` border, height `50px` , placeholder “Search our store”.
- **Orange search button** inside the pill (`58px` , `--orange` fill, navy magnifier icon).
- **Focus:** border → `--blue #1952cc` , background → white.
- Carries the typed query to `#search/<query>` (results page pre-fills). On mobile (<560px) the bar becomes a search icon in the header actions.

5 Hero section

REBUILT

A 4-banner product slideshow on a grained navy background — one banner per buyer type, each routing straight to the right products.

CHANGES TO IMPLEMENT

- **Four product banners** — Main brand (“Hook & Loop That Holds”) · Heavy-duty industrial · Premium quality · Bulk & wholesale — each sending a different buyer to the right products.
- **Per-banner skeleton:** small pill → 5–6-word headline (white + orange accent) → one supporting line → benefit labels (on heavy-duty & bulk) → primary + secondary CTA. Real product photography on the right; the bulk banner uses a warehouse / Australia-wide delivery photo.
- **Every button routes somewhere real** — no dead links (the old “Help me choose” finder button is gone).
- **Motion:** auto-advance every **6s** (crossfade + product scale-in); progress dots with a fill + “01 / 04” counter; pause on hover/focus; reduced-motion pins slide 1. No prev/next arrows.
- **Background:** layered navy radial gradients + fine SVG grain + a warm orange ambient glow; the product card floats on a soft blue spotlight with a hairline border and layered shadow.

6 Product display & card animation

Clean white cards on a tinted band; each with a save-for-later heart, a “complete set” price, and an add-to-cart that posts to a live cart.

Card detail (hover state)

HOOKNLOOP

Self-Adhesive Hook & Loop Roll

★★★★☆ 4.0 · 1 review

Peel-and-stick · cut to length

Complete set from **\$65.80** incl. GST

Add to cart

CARD SPEC + ANIMATION

- White card, `border-radius:16px`, `1px --line-card` border, contained product image (`object-fit:contain`, padding).
- Hover animation:** `translateY(-4px)` + elevated shadow, `transition:.16s/.2s`. Badge (e.g. “Best seller”) top-left.
- Wishlist heart** top-right (localStorage toggle) — fills orange when saved.
- Price shows **“Complete set from \$X · incl. GST”** for hook+loop products; CTA “Add complete set”.

7 “Why HooknLoop” section REDESIGNED

A 3×2 grid of value tiles on the sky-deep tint band. Premium icon chips, soft always-on elevation, orange edge on hover.

SPEC

- Section on `--sky-deep` band; centered eyebrow (“Why HooknLoop”, `#b8460a`) + h2.
- 6 tiles: white card, `border-radius:16px`, icon chip `52px` radius 12px with a subtle orange gradient + inset ring.
- **Hover:** `translateY(-4px)`, shadow up, border → `rgba(232,119,34,.35)`.
- Content = trade reorder drivers: Fast Australian shipping · Secure payment · Bulk & trade pricing · Fire-retardant grades · GST tax invoice · Australian owned.

8 Reviews — “What our customers say” REDESIGNED

A clean 3×2 grid of equal-height review cards, led by trade voices, with a headline rating pill.

CHANGES TO IMPLEMENT

- **Header:** “Reviews” eyebrow + “What our customers say” + a rating pill (★★★★★ 4.87 / 5 · 15 verified reviews across Australia).
- **Layout:** fixed 3×2 grid with **equal-height cards** (quote flex-grows, author row pinned to the bottom) — replaces the ragged/long-card layout. Led by trade voices; keep one durability story, not three.
- **Card:** 5 orange stars (`#b8460a` — AA), quote, an **initials avatar** (navy circle), name + city/state, and an AA-safe green “**✓ Verified**” badge (`#146c43`). “Read all 15 reviews →” link below.
- Star ratings carry an accessible `aria-label` (“Rated 5 out of 5”).

9 Footer

Four columns (brand · shop · help · stay-in-touch with the newsletter) + a legal bar carrying the payment logos.

CHANGES TO IMPLEMENT

- **Copy:** every “Melbourne” store reference → **“Australian”** (it’s a national store). e.g. “Australian warehouse · Australia-wide dispatch”, “Call our Australian team”.
- **Structure:** 4 columns — Brand+phone+ABN · Shop tape · Help · **Stay in touch** (newsletter with email + Notify me). One heading per column, shared baseline hairline.
- **Payment logos** in the legal bar: Visa · Mastercard · Amex · PayPal · Discover · Shop Pay (real full-colour SVGs on white chips).
- Legal bar: © line · payment marks · policy links, on one row. Light vectorised logo on navy.

10 Cart page

Two columns: line items (with free-shipping progress bar) + a sticky order summary. Live totals from localStorage.

SPEC

- **Free-shipping progress bar:** “You’re \$X away from free shipping” with an orange fill (threshold \$200).
- Line items: media · info (name link + variant + remove) · qty stepper · line total.
- Sticky summary card (sky tint): subtotal · shipping · total (incl. GST) · Checkout · trust list (GST invoice · 1–2 day dispatch · wrong-side sorted).
- Empty state: icon + “Your cart is empty” + Shop-all CTA.

11

Wishlist page

NEW

Saved products (localStorage), same card grid as the shop, with a “Clear all” action and an empty state.

SPEC

- Header: “Saved” eyebrow + “Your wishlist” + count (“kept on this device”) + **Clear all** button.
- Grid of product cards (reuses the shop card). Heart on each card toggles membership; header wishlist badge updates live.
- Empty state: heart icon + “Nothing saved yet” + Shop-all CTA.

12

Chatbot

REDESIGNED

The live store's chat launcher uses a **female support-agent photo** as its avatar. The new design drops that photo for a neat, branded support panel with working quick-replies.

SPEC

- No agent photo** — the old store's female support-agent avatar must **not** carry over. The launcher and panel use a clean brand icon only, so the widget stays neat and on-brand.
- Launcher = orange circular FAB, bottom-right, with an online dot.
- Panel: navy gradient header (“HL” chip · “HooknLoop Support” · Online · replies in minutes), a greeting message, and **quick-reply chips** that navigate (Which tape do I need? → finder; Bulk & trade pricing → bulk; Track my order → contact; Fire-retardant specs → collection).
- Message input + send; on send shows a “we’ll reply shortly” confirmation.
- Panel width `360px` , `max-width:calc(100vw-44px)` , entrance animation `0.22s` .

13

Call button

NEW

A dedicated floating call button, bottom-left — a clean white circular icon that dials 1300 183 481.

SPEC

- Circular `56px` FAB, bottom-left, white background / navy icon, `href="tel:1300183481"` .
- Hover tooltip “Call 1300 183 481”; hover lift `translateY(-2px)` .
- Both FABs (call + chat) **park (fade out) when the footer is on screen** so nothing fixed ever covers it; on mobile they also hide while the PDP add-to-cart dock is open.

14 Animations to add

All motion is 150–300ms, GPU-friendly (transform/opacity only), and respects `prefers-reduced-motion`.

MOTION INVENTORY

- **Hero auto-slider:** 4 slides auto-advance every **5s** (crossfade opacity 0.6s + slide `translateY`); the product card **scales in 0.97→1**; the active progress dot fills over 5s. Pauses on hover/focus; reduced-motion pins slide 1. Grained navy background + a blue spotlight behind the product.
- **Facilities marquee:** seamless infinite ticker (two identical rows, `translateX(-50%)`, ~48s linear); pause on hover; reduced-motion → static scrollable row.
- **Product / value / category cards:** hover `translateY(-4px)` + elevated shadow.
- **Nav dropdowns:** fade+slide open (0.15s); chevron rotates; state-driven (hover/click/tap/focus).
- **PDP sticky add-to-cart dock:** glass panel slides up when scrolled past the CTA, retires before the footer; centred with side-gutters so it clears the corner FABs.
- **Floating buttons:** fade/park when the footer is in view (IntersectionObserver).
- **Buttons:** hover `translateY(-1px)`; add-to-cart success → green “✓ Added”.

Reduced motion: a global `@media (prefers-reduced-motion: reduce)` rule near-zeroes all animation/transition durations; the marquee and hero fall back to static frames.

LATEST UPDATE · HOMEPAGE & PRODUCT PAGE

15 Homepage & product-page redesign

A second pass rebuilt the homepage around the live store's real sections and rebuilt the product page. Sections 16–23 show each change, previous → latest.

HOMEPAGE — REMOVED

- The guided “**which tape?**” questionnaire, the **stats strip** (100,000m+ / 1–2 day / ...), the “**Find your fastener**” category grid, and the **fire-retardant band**.

NEW SECTION ORDER

- Hero → One-Stop Shop → Best Sellers & Offers → Trusted Supplier → Why HooknLoop → Reviews

16 One-Stop Shop — lifestyle categories NEW

The live store's “Australia's One-Stop Shop” band, rebuilt as a premium lifestyle bento — one large featured tile plus supporting tiles, each linking to its collection.

WHAT CHANGED

- 12-column bento: a large featured tile (Dots & Coins) + three supporting tiles (Straps, Sew-On, Self-Adhesive).
- Real lifestyle photography with a dark scrim for legibility (WCAG-safe white text), `object-fit:cover`, hover-zoom `scale(1.06)`.
- Each tile links to `collection/<slug>` with an orange “Shop now →” affordance.

17 Best Sellers & Offers NEW

Mirrors the live store's “Best Sellers & Offers” collection — shown as premium product cards. Replaces both the old category grid and the “workhorse” grid.

WHAT CHANGED

- All **12 products** in a responsive 4-column grid, each a full product card.
- **Real star ratings + review counts** per product (from the live listings); “No reviews yet” where the store shows none.
- **Brand label** (HooknLoop) above each name; **corrected per-product images** (VELCRO, sew-on, velcoin and FR sew-on were previously wrong).
- Heading “Best sellers & offers”; the “offers” leads on the real **bulk/volume discounts** (no faked sale prices).

18 Trusted Supplier — B2C & B2B NEW

The live store's “Trusted Hook and Loop Supplier” copy, rebuilt as a two-column editorial section with the original Australia-wide delivery image.

WHAT CHANGED

- Icon-led value blocks for the two original headings (B2C/B2B quality + wholesale/bulk); verbatim store copy, lightly tightened.
- The **original composite image** (hand + glowing Australia delivery map + HooknLoop boxes), optimised 2.2 MB → 256 KB, framed with a 4.87/5 proof card.
- Orange “Read more” CTA.

19

Product cards — brand, rating, correct image

UPDATED

Every product card now carries the brand, its real rating, and the correct photo.

HOOKNLOOP

Self-Adhesive Hook & Loop Roll

★★★★☆

4.0 · 1 review

Peel-and-stick · cut to length

Complete set from **\$65.80** incl. GST

Add to cart

WHAT CHANGED

- **Brand label** “HOOKNLOOP” (blue, uppercase) above the product name.
- **Real star rating + review count** under the name (burnt-ink stars, AA-safe); “No reviews yet” when the live listing has none.
- **Correct product photo** per item — the earlier build reused generic shots for VELCRO, sew-on, velcoin and FR sew-on.
- CTA reads **“Add to cart”** (was “Add complete set”).

20

Product page

REBUILT

The buy box gains the brand, a real rating and SKU; the confusing hook/loop dropdown is gone.

WHAT CHANGED

- **Brand + real rating + SKU** in the title block; **price-per-metre** beside the price.
- **Hook / Loop / Both selector** — the old plain dropdown is replaced with a premium 3-card segmented control; “Both — complete set” is pre-selected and badged “Recommended”, so no one accidentally buys a single half.
- **Removed the buy-box trust list** — reassurance moved to the Buy More & Save trust strip (\$21).
- Correct gallery images + thumbnails per product.

21

Buy More & Save

REDESIGNED

The live store's volume-discount block, rebuilt premium and placed on the product page.

WHAT CHANGED

- Navy-gradient band with an orange glow; 4 tiers (Buy 5+/10+/20+/50+ → 5/10/20/30% off) with a **“Best value”** ribbon on the top tier.
- Slim **trust strip** beneath: Fast Australian shipping · Secured payment · Easy returns.
- **Implementation note:** the tiers are a visual promise in the prototype — wire them to real Shopify automatic cart discounts so checkout actually applies them.

Product FAQs

REAL CONTENT

Each product page now shows its own real, product-specific FAQs.

Previous (live store)

Do I need to buy the hook and loop separately, or does it come together?

—

No way, you don't have to get them apart. You can choose the hook by itself, the loop by itself, or “Both” can be attached to your purchase; this breeds simplicity and the door of immediate usage for the user without any complexity.

What surfaces does this self-adhesive hook-and-loop tape stick to?

+

How many times can this sticky hook and loop fastener be reused?

+

Can I cut the self-adhesive hook & loop tape roll to a shorter length?

+

Does this adhesive hook and loop

Latest (new design)

Questions, answered

Do I need to buy the hook and loop separately, or does it come together?

+

What surfaces does this self-adhesive hook-and-loop tape stick to?

+

How many times can this self-adhesive hook and loop fastener be reused?

+

Can I cut the self-adhesive hook & loop tape roll to a shorter length?

+

Does this adhesive hook-and-loop work outdoors or in warm conditions?

+

WHAT CHANGED

- Per-product FAQs pulled from each live product page (9 of 12 had them); answers rewritten from the store's rough copy into clean, professional English — facts preserved.
- The 4 products with no FAQ on the live store (heavy-duty adhesive, fabric, both fire-retardant) get FAQs written from their real spec sheets — no invented facts.
- Accordion UI, one open at a time.

24

Top value-prop bar

NEW

A clean blue bar above the header carrying the store's key value props.

Latest (new design)

Fast Australia-wide delivery · Free shipping over \$200 · Best price in Australia · ★ 5-star rated store

SPEC

- Centred inline items on `--blue` : *Fast Australia-wide delivery · Free shipping over \$200 · Best price in Australia · ★ 5-star rated store.*
- Orange-tinted highlights on the shipping + rating items; the two optional items hide under 760px. (Replaced an earlier pill treatment.)

25

Estimated-delivery calculator

NEW

On the product page — enter a postcode, get a live arrival estimate.

Latest (new design)

Estimate your delivery

Postcode

Dispatched in 1-2 business days. Enter your postcode for an arrival estimate.

SPEC

- Postcode input → detects **metro vs regional** and shows a computed arrival window.
- Based on the store's real shipping policy: dispatch 1–2 days + metro 2–5 / regional 3–7 business days. Dates computed live on the client.

Description & Key Features

REAL CONTENT

Real product copy from the live store, on every product page.

Latest (new design)

Description

Our Self-Adhesive Hook and Loop Roll is a reusable, useful and handy fastening solution crafted to make installation easy without drilling, screwing or permanent fixing. With an amazing, durable pressure-sensitive adhesive backing, this hook-and-loop system firmly bonds to smooth surfaces. Allowing repeated opening and closing, it remains strong with multiple uses with no loss of grip. It is a dependable sticky hook and loop fastener, delivering steady holding strength for everyday use. Perfect for home projects and commercial applications, this fastener is a dependable and adhesive solution. The rolls come with the beneficial flexibility of cutting down to custom lengths to suit your exact needs.

Key features

✔ Strong rubber adhesive for indoor & outdoor use.

✔ Made from 100% premium nylon.

✔ Works in temperatures from -10°C to 70°C.

✔ Durable and long-lasting performance.

✔ Reusable up to 5,000 times.

✔ Strong self-adhesive backing for quick and tool-free installation.

✔ Customisable length - cut to size as required.

Key applications

✔ Securing mats, rugs & lightweight panels

✔ Office, home & DIY projects

✔ Craft, display & signage

SPEC

- **Description:** the store's real intro copy (heading + paragraphs) per product; **Key Features** as an orange checklist from each product's own “Important Features”.
- Followed by Key applications, Specifications and the product FAQs.

Shipping & Returns rebuilt premium, with the store's real policy content.

SPEC

- Centred navy hero + highlight stat cards + icon-led section cards + a “Need a hand?” / other-policies sidebar.
- Verbatim store content — shipping (1–2 day dispatch, free over \$200, metro 2–5 / regional 3–7) and returns (14-day window, 2-step process, refunds). PDP links to both under the CTA.
